## **ABSTRACT**

The present invention has for its object to isolate a gene coding for the enzyme synthesizing the coenzyme  $Q_{10}$  side chain from a fungal strain of the genus <u>Saitoella</u> and exploit it to advantage for the efficient microbial production of coenzyme  $Q_{10}$ .

The present invention provides;

- a DNA having the nucleotide sequence shown under SEQ ID 10 NO:1
  - a DNA having a nucleotide sequence derived from the nucleotide sequence of SEQ ID NO:1 by the deletion, addition, insertion and/or substitution of one or a plurality of nucleotides
- and coding for a protein having decaprenyl diphosphate synthase activity
  - a DNA which hybridizes with the DNA having the nucleotide sequence of SEQ ID NO:1 under a stringent condition  $\frac{1}{2}$
- and codes for a protein having decaprenyl diphosphate 20 synthase activity.
